DO YOU HAVE AN ACQUIRED NEUROGENIC COMMUNICATION DISORDER?

WE NEED YOUR HELP!

Who is doing the research?
- Researchers in the Department of Communicative Sciences and Disorders at The University of Montana.

What is the research about?
- Learning about the processes in the brain that allow us to speak, and how these processes are disrupted by stroke, traumatic brain injury, or other neurological diseases or disorders.

What is involved in the research?
- Participants will be asked to provide demographic information, neurologic information & medical history;
- Participants will have their vision and hearing screened;
- Participants will have their speech, language, & cognition (thinking) tested;
- Testing of speech, language, and cognition (thinking) should last approximately 4-6 hours, which may be split across 2 sessions;
- Participants will be asked if they would like to be contacted in the future for additional research projects;
- Participation is completely voluntary, and can be stopped at any time.

Who can participate?
- Adults between the ages of 18-90 years old who had an onset/diagnosis of a neurologic injury, disease or disorder at least 3 months ago;
- Participants who have some difficulty with speech or language as a result of a neurologic injury, disease or disorder;
- No known history of psychiatric conditions or substance abuse. Corrected (e.g., glasses, contacts, hearing aids) to normal hearing and vision.

How can I learn more?
- Call Catherine Off, Assistant Professor, at 406-243-2104;
- Send an email to Catherine Off: catherine.off@umontana.edu;
- We cannot guarantee the confidentiality of info sent by email.
